- BSc in Physics, University of Ottawa, 2004

As a registered patent agent, Jean-Francois provides strategic advice on intellectual property acquisition and portfolio development. His practice includes the preparation and prosecution of patent applications, and industrial design applications. He also provides clients with IP management-related advice regarding open-source software.

His clients include start-ups, universities, research institutions, entrepreneurs and multinational corporations. Jean-Francois counsels clients on technologies relating to high-tech areas in the following sectors:

- software
- telecommunications
- advanced materials
- electronics
- optics
- quantum computing
